COMPANY PROFILE

INTRODUCTION

ABOUT OUR COMPANY

ABOUT US

Welcome to Wizard Controls, where innovation meets automation.

At Wizard Controls, we are dedicated to transforming industries through cutting-edge automation solutions. Our company has consistently been at the forefront of technological advancement, providing businesses with smart, efficient, and scalable automation systems.

Wizard Controls is a customer focused automation company specializing in DCS, PLC, SCADA, HMI, telemetry, functional safety, OT networking and energy management systems.

As a systems integration company, we specialize in control systems engineering and real-time software development for a diverse range of hardware platforms. Our trained engineering professionals offer custom product solutions across multiple industries including Chemical, water & waste-water, power & energy, manufacturing.

As an automation company, Wizard Controls provides automation services to tightly integrate process control system to ensure the entire automation system and associated processes function as intended.

Wizard Controls provides all facets of control system engineering services from project management and conceptual design right the way through to final site commissioning. In addition to this, Wizard Controls provides a dedicated 24x7 support service.

OUR VISION

We envision a future where automation drives unparalleled efficiency and innovation across industries. By continuously pushing the boundaries of technology and service, we aim to be the partner of choice for businesses seeking transformative solutions.

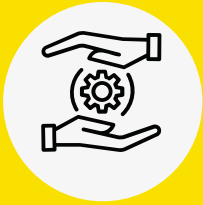

OUR MISSION

Our mission is to empower businesses by streamlining operations, enhancing productivity, and driving sustainable growth. We achieve this by designing and delivering state-of-the-art automation solutions tailored to meet the unique needs of our clients.

What We Do ?

We specialize in a wide range of automation services, including:

Industrial Automation

- Process Control Systems: Design and implement systems for monitoring and controlling industrial processes.
- DCS/PLC Programming: Develop and maintain Programmable Logic Controllers (PLCs) for automating machinery and processes.
- SCADA Systems: Implement Supervisory Control and Data Acquisition (SCADA) systems for real-time data collection and process control.

Custom Automation Solutions

- Tailored Automation Systems: Design and develop custom solutions to address specific business needs and challenges.
- System Integration: Integrate various automation systems and technologies to work seamlessly together.
- Consulting and Feasibility Studies: Offer expert advice on automation strategies and conduct feasibility studies to assess potential benefits and risks.

Maintenance and Support

- System Maintenance: Provide ongoing maintenance services to ensure automation systems operate efficiently and reliably.
- Technical Support: Offer support services to troubleshoot and resolve issues with automation systems.
- Upgrades and Enhancements: Implement system upgrades and enhancements to keep pace with technological advancements.

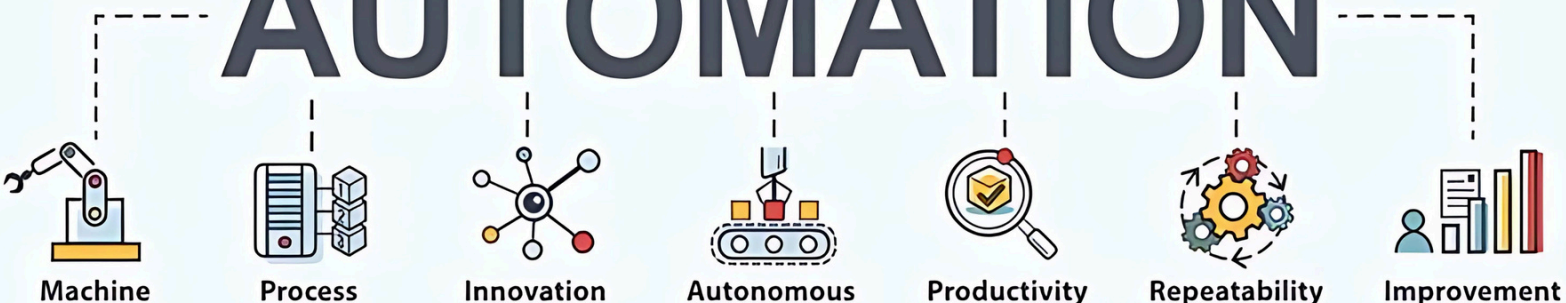

Training and Education

- User Training: Provide training for end-users on how to operate and maintain automation systems.
- Technical Training: Offer specialized training for technical staff on system installation, programming, and troubleshooting.

AUTOMATION

Why Choose Us?

Expertise: Our team of experienced engineers and technicians brings deep industry knowledge and technical expertise to every project.

Innovation: We leverage the latest technologies and methodologies to ensure our solutions are at the cutting edge.

Customer-Centric Approach: We prioritize understanding your unique challenges and goals to provide solutions that deliver real value.

Commitment to Quality: We adhere to the highest standards of quality and reliability, ensuring our systems perform flawlessly and stand the test of time.

Our Services

- Process Control Systems
- DCS/PLC Systems
- SCADA Systems
- Third Party System Integration like OPC, Modbus, Profibus, Profinet

- System Maintenance
 - Technical Support
 - Upgrades and Enhancements
 - Energy Monitoring System
 - Real-time data acquisition and reporting
 - OT & IIoT Network Engineering
- 

Wizard Controls provides a dedicated 24/7 support service including:

- Telephone support
- Online support
- Site support
